

## **Abstract**

**Title:** General Project for Private Kindergardens

**Objectives:** The primary aim of this diploma thesis is a survey of quality in organization of physical activities at the private kindergardens in Liberec. The secondary aim is to create a general framework for a specific kindergarden incorporated into the Czech Republic Index of Kindergardens.

**Methods:** This work combines direct, indirect and document methods; namely observing, dialogues, subject analysis and analysis of a secondary pedagogical school curriculum, which is a basis for theoretical and then consecutively for practical starting points of the work. The ascertained data are processed quantitatively.

**Results:** Launching out into the market sector of private kindergardens in Liberec is not difficult. The quality of the physical activities offer shows an average up to below-average level but they keep a leading position in number of children per one teacher. Furthermore, there was found a lack in conducting children within physical activities in the public kindergardens in Liberec. The teachers are not offered any further education courses in this field by Liberec city council.

**Keywords:** teacher, organisation, sport, education, outdoor
